

Project Atlas – Q4 Executive Status

Building the next-generation AI platform for a more productive enterprise

ON TRACK

Overall project health
Unchanged since Q3

Completion
72%
of scope delivered

Budget used
64%
\$4.1M of \$6.4M

BOTTOM LINE

MVP ships on time. GPU capacity is the one risk to a Q2 launch.

Key milestones

Sep 30

Foundation
Complete

Dec 15

MVP release
In progress

Feb 15

Public beta
Planned

KEY RISK **Medium**

GPU capacity from our third-party provider is not yet confirmed for Q1

If unresolved, the public beta slips four to six weeks

NEXT DECISION **By Dec 6**

Approve a \$0.6M reserve for dedicated GPU capacity

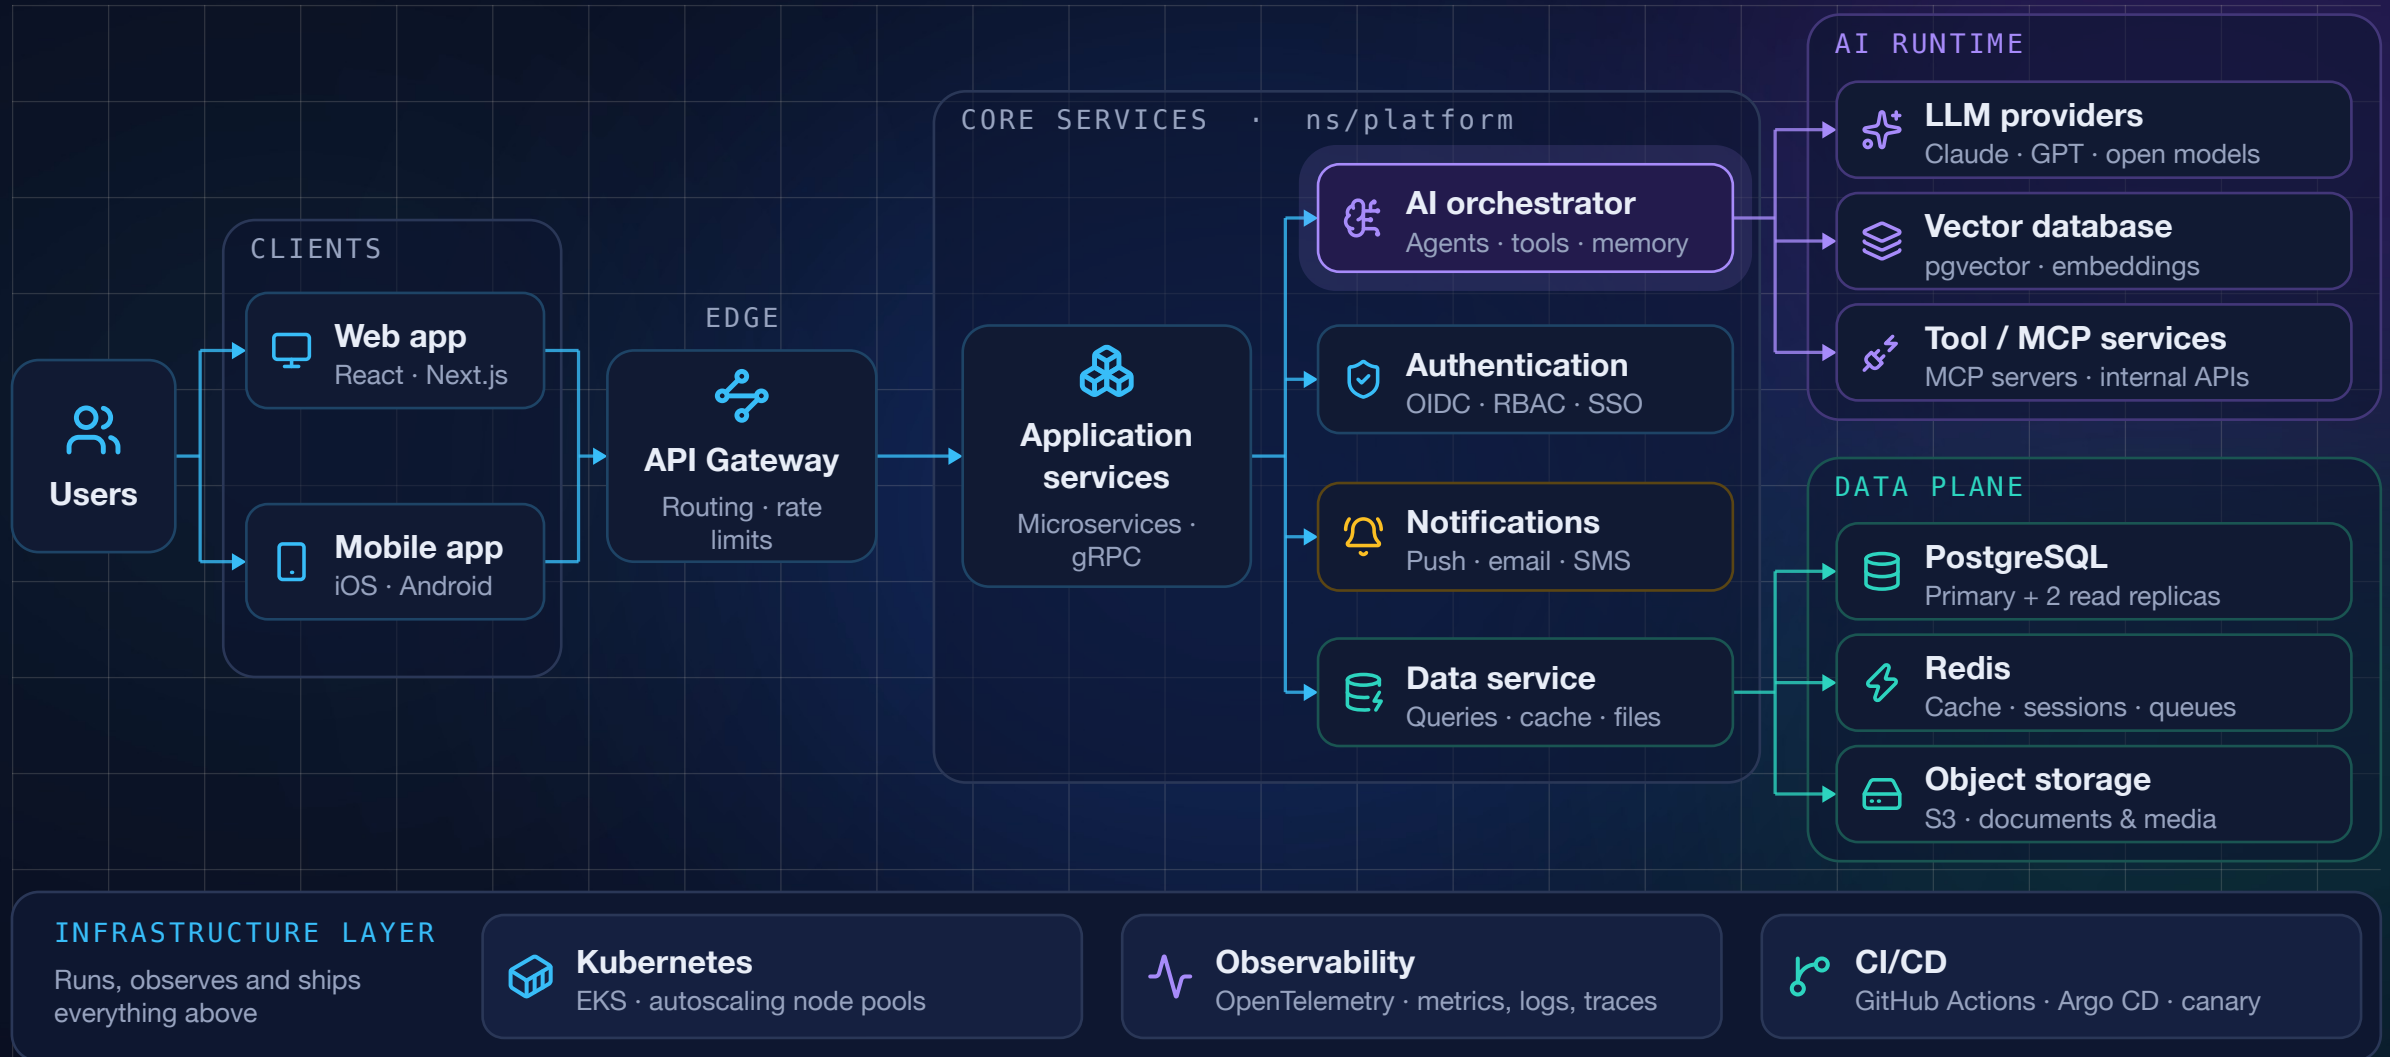

Secures the Feb 15 beta and de-risks the Q2 launch

AI Platform — Production Architecture

ARCHITECTURE REVIEW
rev 2.3 · prod / us-east-1

Scalable, secure and modular architecture for AI-powered applications

● Request path ● AI runtime ● Data plane

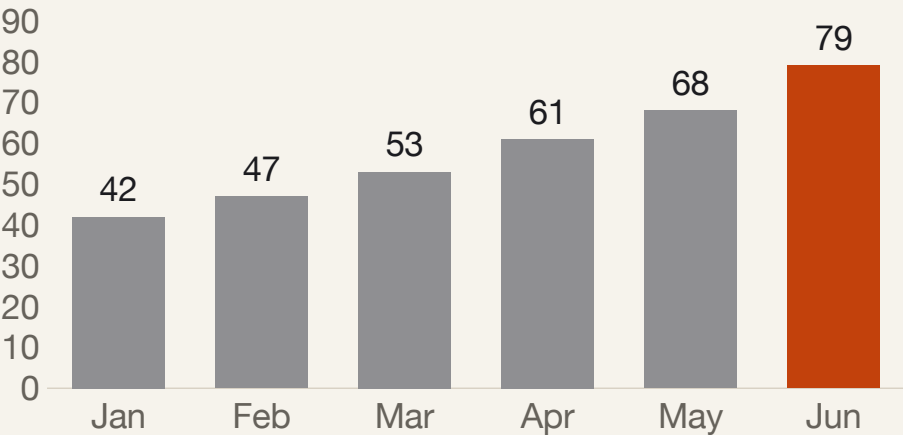

From growth to retention: what the data tells us

Six months of product data, three signals, and one decision.

01 ACQUISITION

Users are arriving faster every month

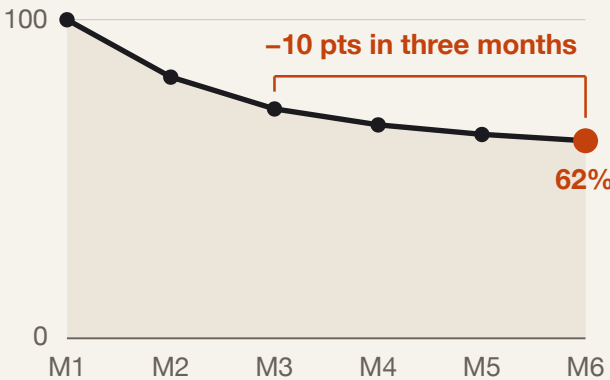

+88% monthly active users,
42K in January, 79K in June

02 RETENTION

Cohorts settle by month 3

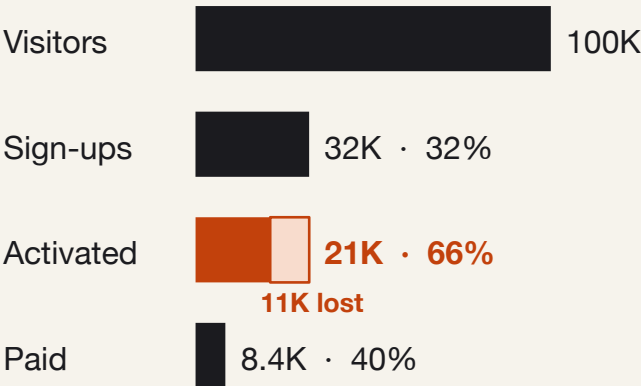

62% still active
at month 6

03 ACTIVATION

Activation is the leak

8.4% of visitors become
paying customers

THE TAKEAWAY

Acquisition is accelerating, but activation remains the biggest growth lever.

+1.8K paid users a month if activation
rises from 66% to 80%
