 Alex Kim

Good morning, Alex

What will you build today?

 Turn my idea into a launch plan...

Launch plan ready
Drafted in 12 seconds

Your ideas should move faster than your tabs.

NOVA brings context, creation and execution into one workspace.

Less switching. More making.

Keep your research, drafts, data and next actions connected.

One context

Knowledge follows the work.

One canvas

Ideas become usable artifacts.

One flow

Actions continue after the draft.

Four capabilities. One connected canvas.

Every capability builds on the context already in your workspace.

Research

Find evidence and keep sources attached.

Create

Turn raw thinking into documents and slides.

Analyze

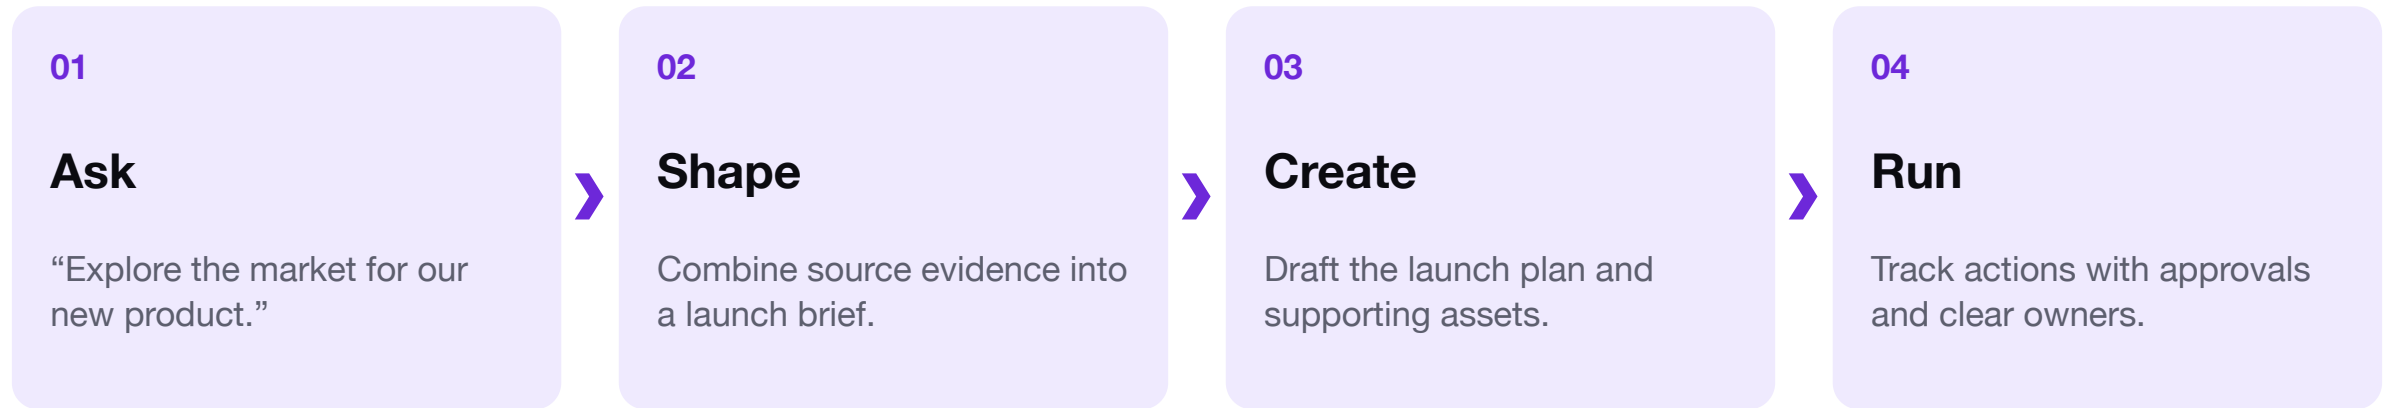

Ask questions of data and explain the result.

Automate

Hand off repeatable steps to governed agents.

A launch plan, from first thought to next action.

An illustrative workflow: research a market, create a plan, then hand off the follow-through.

From idea to execution without leaving your workspace.

NOVA

Make room for your next big idea.

Research. Create. Analyze. Automate.
